In no event shall the publisher and the author be liable for any loss of profit or any other commercial damage caused or alleged to have been caused directly or indirectly by this document.

## 1.1 Using this Guide

Throughout the manual the following text styles are used to highlight important points:

- Useful features, hints and important issues are called "notes" and they are identified in a light blue background.

**Note:** This is a note.

- Practical examples are presented throughout the manual for deeper understanding of specific concepts. These are called "examples" and are identified with a light green background.

This is an example.

- Warnings that can cause damage to the device are included when necessary. These are indicated by the word "caution" and are highlighted in yellow.

**Caution:** This is a caution.

## 1.2 Further Reading

In addition to this Applications List, the following additional user documentation is available:

- Exinda Quick Start Guides
- Exinda User Manual
- Exinda "How To" Guides

Please visit <http://www.exinda.com> for more information.

## 2 Overview

Applications are used to define applications that run over the network. There are 100s of predefined Applications built into the Exinda appliance - these are outlined in the next chapter. Applications are made up of:

- A Network Object, and either
- TCP/UDP ports
- TCP/UDP port ranges
- A layer 3 protocol, or
- A layer 7 signature

It is also possible to create custom Applications based on any or all of the above properties, in addition to the built-in Applications. Some Layer 7 signatures have additional options that allow you to define Application Objects based on specific parts of that L7 Signature. The following table explains the various options available:

citrix	application	Allows you to define an Application Object based on a published Citrix application name.
	priority ^	Allows you to define an Application Object based on a published Citrix priority. Citrix priorities are 0=High, 1=Medium, 2=Low, 3=Background.
	user	Allows you to define an Application Object based on the user running the Citrix published application.
flash	host	Allows you to define an Application Object based on the 'host' field in the HTTP header (where flash is running over http).
http	content_type	Allows you to define an Application Object based on the 'content-type' field in the HTTP header.
	file	Allows you to define an Application Object based on the filename requested in the HTTP URL.
	host	Allows you to define an Application Object based on the 'host' field in the HTTP header.
	method	Allows you to define an Application Object based on the HTTP method (e.g. GET PUT HEAD DELETE).
	user_agent	Allows you to define an Application Object based on the 'user-agent' field in the HTTP header.
ssl	common_name	Allows you to define an Application Object based on the 'common name' field in the SSL certificate.

	organization_name	Allows you to define an Application Object based on the 'organization name' field in the SSL certificate.
rtp	codec	Allows you to define an Application Object based on the 'codec' used in a RTP stream.
window media	host	Allows you to define an Application Object based on the 'host' field in the HTTP header (where windowmedia is running over http).

**Note:** For more information, consult the Exinda User Manual.

**Part**

### 3 Applications

Exinda devices discover and classify a variety of applications. Applications not found in this list can be added manually.

New application signatures are made available frequently via the Firmware update system for appliances that have valid Exinda Software Subscription.

The following list of applications is supported by Firmware update version 6.1.0 and higher.

#### 3.1 Peer-to-Peer Applications (P2P)

<b>Aimini</b>	BitTorrent / Mainline	<b>DirectConnect</b>	<b>Gnutella</b>
<b>AppleJuice</b>	6.4b	ApexDc++ 1.2.1	Acquisition 2.1
AppleJuice	BitTorrent / Mainline	ApexDc++ 1.3.4	Acquisition 2.2.1
0.29.142.229	7.1	BCDC++ 0.750b	Acqlite 0.3.5
AppleJuice 0.30.146	BitTorrent / Mainline	BCDC++ 0.770ax	Acqlite 0.4.1
AppleJuice	7.2	CZDC 0.699b2	Apollon 1.0.2.1
0.31.149.110	BitTyrant 1.1.1	CZDC 0.699c	BearFlix 1.2
<b>Ares</b>	Blizzard Downloader	DC#	Cabos 0.8.1
Ares 1.9.2	BTG 0.9.2	DC++ 0.691	Cabos 0.8.2
Ares 2.0.8	BtManager 1.99.4	DC++ 0.695	CocoGnut 1.21
Ares 2.0.9	BTSharp 3.1.0b	DC++ 0.698	DM2 1.23.1
Ares 2.1.1.3035	burst! 3.1.0b	DC++ 0.699	Filepipe
Filepipe 2.7	CTorrent 1.3.4	DC++ 0.705	FrostWire 4.18.1

depositfiles.com	ftp2share.com	quicksharing.com	uploaded.to
easy-share.com	gigasize.com	rapidshare.com	uploading.com
filearchiv.ru	gigeshare.com	rapidshare.de	uploadingit.com
filebase.to	ifolder.ru	rapidupload.com	uploadpower.com
filecloud.com	keepmyfile.com	savefile.com	uploadyourfiles.de
filefactory.com	load.to	sendmefile.com	vip-file.com
filefront.com	livedepot.net	sendspace.com	wiiupload.net
fileho.com	live-share.com	sharebee.com	yourfilehost.com
filehost.tv	mediafire.com	sharebig.com	yourfiles.biz
filesafe.to	megashare.com	sharebigfile.com	zshare.net

### 3.5 Anonymous Proxy

Supports tens of thousands of dynamic Anonymous Proxy sites via daily updates (disabled by default).

In addition, the following Anonymous Proxy applications are detected:

#### **MyFreedom 2.1-rc9**

##### **Socks**

Socks v4

Socks v5

##### **VoipSwitch VoIP Tunnel**

##### **VTun**

VTun 3.0.2-1.1

##### **YourFreedom**

**Note:** For more information, consult the [Anonymous Proxy How to Guide](#).

### 3.6 Games

**Armagetron**  
**CGA Games**  
**Battlefield**  
**Call of Duty**  
**Club Penguin**  
**Crossfire**  
**Doom 3**  
**Dofus**  
**Fiesta**  
**Florensia**

**GuildWars**  
**GTP**  
**Half-Life 2 and Mods**  
**Halo**  
**Lively**  
**MapleStory**  
**Playstation (PS3)**  
**Popo Game**  
 Popo Game  
 2.0.26176.1  
**Quake**  
**QQ Game**

**rFactor**  
**Second Life**  
 Second Life  
 1.21.6.99587  
**Sina Game**  
**Spellforce**  
**SplashFighter**  
**Steam**  
 Steam v008 49/770  
**TeamSpeak**  
**Unreal**

**Ventrilo**  
**Vietcong**  
**Warcraft 3**  
**Wii**  
**World of Kung Fu**  
**World of Warcraft**  
 World of Warcraft  
 1.4.0.228  
**Xbox**  
**Yahoo Games**

### 3.7 Streaming

**AVI**  
**Feidian**  
 Feidian 1.0.1.32  
 Feidian 1.3.1

## 4 Application Groups

The default Application Groups are listed below. These default Application Groups are made up of common Applications grouped into meaningful categories.

### Database Services

MS-SQL

MySQL

Oracle

PostgreSQL

TDS

### Exinda

ExindaAD

ExindaCom

ExindaWM

### File Services

Apple Talk

CIFS

FTP

NCP

NFS

rsync

TFTP

### Games

Armagetron

Battlefield

Call of Duty

Club Penguin

Crossfire

Dofus

Doom3

Fiesta

Florensia

GTP

GuildWars

Half-Life 2

MapleStory

PS3

Quake-HalfLife

rFactor

Second Life

SplashFighter

Steam

TeamSpeak

Unreal

Warcraft 3

Wii

World of Kung Fu

World of Warcraft

xbox-live

#### **Instant Messaging**

IRC

Jabber

Meebo

MSN

Oscar

PalTalk

Skype

Yahoo

WhatsApp

#### **Interactive**

BGP

echo

MGCP

Remote Telnet

rlogin

SSH

Telnet

Time Server

**Mail**

Blackberry

IMAP

IMAP-SSL

LotusNotes

MAPI

POP

POP-SSL

SMTP

**P2P**

Ares

BitTorrent

Edonkey

Feidian

Filetopia

Gadu-Gadu

Gnutella

Kazaa-Fastrack

Kontiki

Open FT

POPO

PPLive

PPStream

QQ

QQLive

Soulseek

StealthNet

UUSEE

Webthunder

ZATTOO

**Recreational**

Anonymous Proxy
